

Includes a CD packed with computer codes and databases

Numerical Modeling of Explosives and Propellants

Third Edition

Charles L. Mader • Mader Consulting Co., Honolulu, Hawaii, USA

Learn the Newest Computational Methods and Experimental Measuring Techniques

Major advances, both in modeling methods and in the computing power required to make those methods viable, have led to major breakthroughs in our ability to model the performance and vulnerability of explosives and propellants. In addition, the development of proton radiography during the last decade has provided researchers with a major new experimental tool for studying explosive and shock wave physics. Problems that were once considered intractable – such as the generation of water cavities, jets, and stems by explosives and projectiles – have now been solved.

Access the latest data generated by the
Los Alamos National Laboratory and the
Russian Federal Nuclear Centers

Numerical Modeling of Explosives and Propellants, Third Edition provides a complete overview of this rapidly emerging field, covering basic reactive fluid dynamics as well as the latest and most complex methods and findings. It also describes and evaluates Russian contributions to the experimental explosive physics database, which only recently have become available.

This book comes packaged with a CD-ROM that contains—

- FORTRAN and executable computer codes that operate under Microsoft® Windows Vista operating system and the OS X operating system for Apple computers
- Windows Vista and MAC compatible movies and PowerPoint presentations for each chapter
- Explosive and shock wave databases generated at the Los Alamos National Laboratory and the Russian Federal Nuclear Centers

Charles Mader's three-pronged approach – through text, computer programs, and animations – imparts a thorough understanding of new computational methods and experimental measuring techniques, while also providing the tools to put these methods to effective use.

Catalog no. 52381, October 2007, 544 pp.
ISBN: 978-1-4200-5238-1, \$149.95 / £82.00

FEATURES

- Examines the latest major breakthrough in modeling explosives and propellants
- Includes a CD-ROM with data volumes of explosive and shock wave properties, as well as PowerPoint presentations with movies for each chapter, and FORTRAN and executable codes for modeling explosive performance and hazards
- Describes and applies the new AMR reactive hydrodynamics NOBEL code to radiographic studies generated using the proton radiographic diagnostic tool PRad

CONTENTS

The Detonation Wave
Steady-State Detonations
Resolved Reaction Zone Detonations in One Dimension
Two-Dimensional Reaction Zones of Homogeneous Explosives
Discussion of Reaction Zones of Homogeneous Explosives
Three-Dimensional Reaction Zones of Homogeneous Explosives
Performance of Explosives and Propellants
Steady-State Detonations
Nonideal Detonations
Nonsteady-State Detonations
Nitrogen Oxide
Carbon Condensation
CNO Explosives
Density
Propellant Performance
Russian Nonsteady-State Detonation Studies
Craig Decay Zones
Initiation of Detonation
Thermal Initiation
Shock Initiation of Homogeneous Explosives
Shock Initiation of Heterogeneous Explosives
Modeling Initiation of Heterogeneous Explosives

See reverse side for continuation of Contents, Other Titles of Interest and ordering information

Contents continued...

The Forest Fire Model
 Heterogeneous Detonations
 Desensitization by Preshocking
 Projectile Initiation of Explosives
 Burning to Detonation
 Interpretation of Experiments
 Plane-Wave Experiments
 Explosions in Water
 The Plate Dent Experiment
 The Cylinder Test
 Jet Penetration of Inerts and Explosives

Plane Wave Lens
 Regular and Mach Reflection of
 Detonation Waves
 Insensitive High Explosive Initiators
 NOBEL and Prad
 Year History
 The Nobel Code
 Proton Radiography (PRad)
 Colliding Diverging PBX-9502
 Detonations
 Explosively Generated Water Cavities

Munroe Jets
 NOBEL Explosive Build-Up
 Shaped Charge Jet Formation and
 Penetration
 Hydrovolcanic Explosions

Ordering Information: Orders must be prepaid or accompanied by a purchase order. Checks should be made payable to CRC Press. Please add the appropriate shipping and handling charge for each book ordered. All prices are subject to change without notice. If purchasing by credit card please be sure to include the 3 digit security code that appears on the back of your card in the "sec code" field provided below.
U.S./Canada: All orders must be paid in U.S. dollars. TAX: As required by law, please add applicable state and local taxes on all merchandised delivered to AZ, CA, CO, CT, FL, GA, IL, KY, MA, MD, MO, NJ, NY, PA, TN, TX, VA, and Canada. For Canadian orders please add GST and HST. We will add tax on all credit card orders.
European Orders: All orders must be paid in U.K. £. VAT will be added at the rate applicable. **Textbooks:** Special prices for course adopted textbooks may be available for certain titles. To review a book for class adoption, contact our Academic Sales Department or submit your textbook evaluation request online at www.crcpress.com/eval.htm **Satisfaction Guaranteed:** If the book supplied does not meet your expectations, it may be returned to us in a saleable condition within 30 days of receipt for a full refund.
